### Training

Customized training for staff to improve knowledge and skill

### Industry Publications

Stay abreast of new or revised international publications supplied by WFS

## Is Your Supply Partner Keeping Pace with Industry Practices?

Even the most successful marine organization can be challenged to ensure that operating standards, equipment and staff knowledge are always up-to-date. Industry standards and guidelines such as ISO, CIMAC and IMO evolve frequently, requiring regular reviews and updates of quality management systems, plus staff re-training. Operations can fall behind when requirements are not known or clearly understood, creating risks such as competitive disadvantage, damaged reputation and lost revenue.

## Get the Right Supply Partner

Help your organization avoid these issues - ensure that your fuel and lubes supplier is current with the latest industry best practices and your requirements. World Fuel Services is a more reliable partner because:

1. We know shipping, because we have worked it – our marine tech staff is educated and experienced in ship design, operations, maintenance
2. We know bunkering, because we have worked it – our marine tech staff are educated and experienced in refining, measurement, operation and analysis of bunker fuels
3. We know the rules, because we participate in their development through industry associations
4. We vet every supplier using WFS and industry standards to select safe, reliable, reputable providers
5. We vet and/or inspect vessels we charter using WFS and industry standards
6. We work with our customers to resolve technical issues regarding fuel quality
7. We train our brokers and traders in bunker fuel quality and quality impacts on performance
8. Our marine tech staff is backed up by a global team of health, safety, and environmental experts
9. At WFS, all of these experts work together as one team to ensure the best possible outcome for our customers

## Flexible, Tailored Services Fit Your Needs

Our offering is flexible to help you get the services your operation needs. We'll work with you to incorporate any or all of our available services, and we may be able to provide other technical support services not listed, subject to specific requirements and agreement.

## Put Our Experience to Your Advantage

Our Marine Team flexibly supports your operation through up-to-date knowledge and strong sea operations experience. As a global, single-source provider of fuel and lubes supply and related energy services for aviation, marine and land, World Fuel Services is respected for our industry leadership and our solid history of quality assurance. Our technical advisory team members don't just have impressive resumes; they are also a leading force in the development of global industry recommended practices and standards. Our expertise works to support your operation's quality and regulatory compliance.
